

## APPLICATION

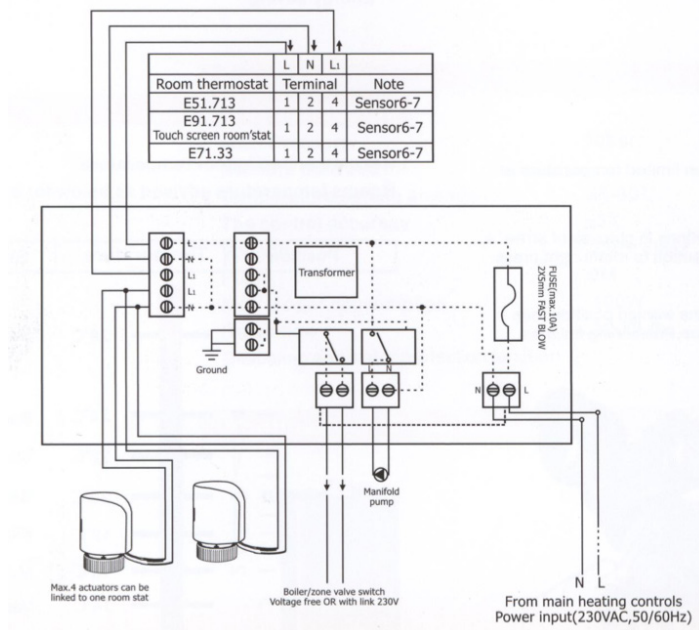

The wiring box is designed for connecting electro-thermal actuators to the room thermostats in hydraulic floor heating systems. It can also be equipped with a programmable timer switch to optimize your control of floor heating systems.

## TECHNICAL DATA

Supply Voltage	230VAC, 50Hz
Output Voltage	230VAC, 50Hz
Max Load	4A
Number of Zone outputs	8 Zones, 12 Zones
Potential-free outputs	One relay for boiler One relay for pump
Dimension (mm)	310w x 110h x 58d

## WIRING DIAGRAM:

Model	Supply voltage	Output voltage	Loops
H-BOX208	230V	230V	8
H-BOX212	230V	230V	12
